

10 September 2020

Ms. Monica Collins
Assistant Secretary
Office of Compliance
Department of the Environment and Energy

C/-

Mr. Grant Liddy
Director
Environmental Audit Section
Department of the Environment and Energy
Phone: 02 6274 1199
Email: grant.liddy@environment.gov.au

Dear Ms. Collins,

GOOGONG TOWNSHIP – EPBC 2011/5829, CONDITION 6 COMPLIANCE REPORT

I write to you to satisfy Condition 6 of the EPBC Act Approval of Googong Township (Ref EPBC 2011/5829), which states the following.

6. *Within three months of every 12 month anniversary of the commencement of the action, the person taking the action must publish a report on their website addressing compliance with each of the conditions of this approval, including implementation of any management plans and strategies as specified in the conditions. Documentary evidence providing proof of the date of publication and non-compliance with any of the conditions of this approval must be provided to the department at the same time as the compliance report is published.*

Each of the Conditions of Approval (CoA) is repeated in italics below followed by a statement of compliance as of 9 September 2020.

1. *The person taking the action must prepare and submit a Pink-tailed Worm-lizard Protection and Management Plan for the Minister's approval for the protection of Pink-tailed Worm-lizard (Aprasia parapulchella). The plan must include:*
- i. Details of the establishment of the Pink-tailed Worm-lizard Conservation Area;*
 - ii. Management measures to mitigate construction impacts;*
 - iii. Measures for the management of the Pink-tailed Worm-lizard Conservation Area for before and after the conservation area's dedication to Queanbeyan City Council or other appropriate authority;*
 - iv. Maps showing fences and other infrastructure;*
 - v. Details of legal mechanisms to protect the conservation area in perpetuity; and*
 - vi. Provision for public comment on the draft plan.*

The plan must be submitted to the Minister for written approval within 6 months of the date of this approval.

GOOGONG TOWNSHIP PTY LIMITED

Level 3, 64 Allara Street Canberra ACT 2600 • PO Box 1000 Civic Square ACT 2608
Tel 02 6230 0800 • Fax 02 6230 0811 • admin@googong.net • googong.net

Googong Township Pty Limited ACN 154 514 593 as trustee for Googong Township Unit Trust

The person taking the action must not commence construction within 50m of Pink-tailed Worm-lizard habitat until the Minister has approved the plan.

The Pink-tailed Worm-lizard Protection and Management Plan (PTWL-P&MP) (Version 2, dated 4 July 2012) was prepared by Biosis Pty Ltd on behalf of Googong Township Pty Ltd (GTPL) pursuant to CoA1, and was approved by the Minister's Delegate, Charmayne Murray, on 17 July 2012. As detailed in the PTWL-P&MP, the trigger for commencement of works to establish, protect and improve the PTWL habitat within the PTWL Conservation Area is the commencement of construction works within 50m of the identified Pink-tailed Worm-lizard habitat (referred to as the 'Year 0 Trigger Line').

The PTWL-P&MP underwent four revisions subsequent to the initial approval, with Version 5, dated 6 July 2014, submitted to the Department of the Environment and Energy (the 'Department') on 16 July 2014 and approved by the Minister's Delegate, Shane Gaddes, on 2 September 2014.

Section 3.3 of the PTWL-P&MP (Ongoing review of this PTWL – P&MP) states that –

This PTWL-P&MP is subject to review at least every five (5) years. Reviews will be undertaken to provide for adaptive management and to ensure that the objectives of the PTWL Conservation Area are being suitably achieved. The review will be conducted by GTPL prior to handover to Council and by Council post handover. GTPL and Council may conduct the review in-house if suitable expertise is available or engage another suitably qualified specialist/organisation.

In accordance with the above, GTPL, assisted by Capital Ecology, continue to review the PTWL-P&MP on a regular basis to guide establishment of the PTWL Conservation Area and its ongoing monitoring and management. In addition to this, in 2019 GTPL engaged Capital Ecology to review the PTWL-P&MP and its implementation. Based on this review, together with the findings of studies and observations from the last five years, it was determined that several elements of the actions/commitments of the PTWL-P&MP required minor modification to best achieve the objectives of the PTWL Conservation Area and accommodate engineering constraints identified during detailed design for the future Neighbourhood 5 which will adjoin the PTWL Conservation Area's southern boundary. Accordingly, Version 6 of the PTWL-P&MP was developed to reflect the necessary modifications and submitted to the Department on 10 October 2019. Version 6 was approved by the Minister's Delegate, Greg Manning, on 24 October 2019, and a copy was then uploaded to <http://compliance.googong.net/epbc/>.

As detailed in Version 6 of the PTWL-P&MP, one of the key modifications is that GTPL decided to bring forward establishment of the Stage 2 boundary (i.e. Stage 2 fence construction, importation of habitat rock, and PTWL translocation) to the 2019-20 financial year, rather than wait for the Stage 2 trigger. Accordingly, establishment of the Stage 2 boundary was completed in July 2020, and this completes establishment of the PTWL Conservation Area. Bringing establishment of the Stage 2 boundary forward is a positive outcome for the conservation of the PTWL at Googong.

- 2. To prevent impacts on listed threatened species and ecological communities, and the environment on Commonwealth land, the person taking the action must prepare and submit a Googong Foreshores Interface Management Strategy for the Minister's approval. The strategy must include measures to:*

- i. *Induct construction workers and contractors about requirements to protect threatened species and the environment on Commonwealth land;*
- ii. *Provide indicative environmental management checklists to assist with monitoring the implementation of environmental obligations during construction works;*
- iii. *Establish and maintain fences;*
- iv. *Identify and implement erosion sediment control measures;*
- v. *Identify and implement appropriate weed hygiene measures;*
- vi. *Protect and maintain the Googong Foreshores buffer area;*
- vii. *Provide details of financial contributions for the publishing, monitoring and review of the Googong Foreshores Plan of Management;*
- viii. *Provide details of financial contributions for capital and recurrent costs associated with the implementation of Googong Foreshores Plan of Management;*
- ix. *Manage community and water supply impacts, including measures from the Queanbeyan Local Environmental Plan (Googong) 2009;*
- x. *Provide details of an environmental education program, which must include information about the protection of water quality in the Googong reservoir,*
- xi. *Indicate timing and frequency of monitoring to determine impacts and effectiveness of mitigation measures;*
- xii. *Provide performance indicators, specifying outcomes to be achieved and reports of compliance at key milestones;*
- xiii. *Undertake corrective actions if management measures are not achieved;*
- xiv. *Clearly state the person or persons responsible for each management measure; and*
- xv. *Provide details of how the area to be managed under the Googong Foreshores Interface Management Strategy will be managed in perpetuity.*

The area to be managed under the Googong Foreshores Interface Management Strategy is defined by Figure 1 at Appendix 1. This map must be included in the Googong Foreshores Interface Management Strategy.

The person taking the action must not commence construction of neighbourhoods 1B, 4 or 5 as defined by Figure 8 at Appendix 2, until the Minister has approved the strategy.

The approved Googong Foreshores Interface Management Strategy must be implemented.

Developed in accordance with CoA 2, Version 2 of the GFIMS (dated 16 December 2013) was submitted for Ministerial approval on 16 December 2013 and was approved by the Minister's Delegate, Shane Gaddes, on 20 December 2013.

The GFIMS was subsequently revised to incorporate alterations to the form and extent of the PTWL Conservation Area identified as necessary during detailed design of the adjoining Googong Township Neighbourhood 1B. The resulting GFIMS Version 3, dated 7 July 2014, was submitted to the Department on 16 July 2014 and was approved by the Minister's Delegate, Shane Gaddes, on 2 September 2014.

As first noted in the 2015 and 2016 compliance reports, in accordance with the commitments in the GFIMS, the below measures were implemented or commenced prior

to the 4 May 2015 Googong Foreshores Township Interface Working Group (the 'Working Group') meeting. A brief update on these measures is provided under each.

- a. GTPL, in collaboration with the Working Group, developed and implemented the components of the Googong Township Environmental Education Program (EEP) which relate to the protection of water quality in the Googong Reservoir.

GTPL have continued to issue a Welcome Information Pack, develop the quarterly newsletter, periodically update the information on googong.net and the Googong Facebook page, and roll-out a program of seminars and events. GTPL, ACT-PCS and Icon Water are also continuing their collaborative work to develop interpretive signage which will be displayed in the open space areas of Googong Township. This signage will educate future residents and visitors regarding the importance of the Googong Township water treatment network, as well as the flora, fauna and ecological communities of the Googong region.

- b. Post approval of the DA for the adjacent Neighbourhood 1B, GTPL commissioned the works required to meet the relevant GFIMS commitments as detailed in the approved GFIMS Version 3. Specifically, the works required were those also required for establishment of the PTWL, being the:

- construction of the 'Type 1' fence along Stage 1 as illustrated in Figure 9.1 of the GFIMS; and
- completion of an intensive program of woody weed control/removal throughout the portions of the GFIMS Area adjacent to NH1B.

As noted above, GTPL engaged a qualified weed control contractor to undertake follow-up woody weed control over the 2015-16, 2016-17 and 2017-18 summer periods to treat any re-shooting weeds and newly established weeds. This follow-up weed control primarily targeted reshooting Blackberry and Sweet Briar (treatment via poisoning and physical removal) and covered the entire PTWL Conservation Area and the two 1.5 ha lots in the GFIMS area to the north of the PTWL Conservation Area.

Observations by R. Speirs while leading a community engagement tour in October 2018, together with those during Capital Ecology site inspections in March 2019 and February 2020, indicate that woody weeds have been largely eradicated from the PTWL Conservation Area. As such, GTPL will continue to monitor for weed occurrence within the PTWL Conservation Area and ensure that targeted weed control is applied if significant weeds are identified.

As noted above, GTPL decided to bring forward establishment of the Stage 2 boundary to the 2019-20 financial year, rather than wait for the Stage 2 trigger. Accordingly, establishment of the Stage 2 boundary was completed in July 2020, and this completes establishment of the PTWL Conservation Area. GTPL will continue to maintain Stages 1 and 2 of the PTWL Conservation Area fence.

A Development Application (DA) was lodged with Queanbeyan-Palerang Regional Council (QPRC) in 2018 for Stage 9 of NH1B. Stage 9 includes land comprising part of the GFIMS Area and designated MA4 – Managed Residential Area in the GFIMS. Approval of the DA was received in May 2020 and works commenced in August 2020.

It is recognised that an earlier expected commencement for Stage 9 of NH1B was noted in the 2018 compliance report, however approval of the DA for Stage 9 was substantially

delayed by the extended period of odour testing required for the adjacent Googong Water Recycling Plant. This delay pushed back the commencement for Stage 9 to August 2020 as noted above.

The NH1B Stage 9 area of MA4 is additional to the portion of the GFIMS Area encompassed by the PTWL Conservation Area (i.e. MA1), and thus, to date this area has not been subject to specific monitoring. Commencement of development within Stage 9 will trigger the implementation of the GFIMS and the corresponding requirement set out in Section 6.2.1 of the GFIMS to undertake the first annual monitoring event during 2020-21. As prescribed in Section 6.2.2, the results of the monitoring event will be reported on in the GFIMS Implementation Report to be prepared following the monitoring event. The GFIMS Implementation Report will be reviewed by the GFTI Working Group and then published on <http://compliance.googong.net/epbc/> and a copy will be provided to the Department.

3. *Following approval of the Googong Foreshores Interface Management Strategy and prior to commencement of construction of neighbourhoods 1B or 5, the person taking the action must establish a committee that would oversee the implementation of the Googong Foreshores Interface Management Strategy and;*
 - i. *Invite relevant stakeholders to sit on the committee, including representatives from relevant government agencies;*
 - ii. *Call committee meetings in May and November of each year to consider and determine responses to issues associated with implementation of the Googong Foreshores Interface Management Strategy until all its obligations under the Googong Foreshores Interface Management Strategy have been met and land subdivision and water cycle project works have been completed;*
 - iii. *Ensure the committee meets at least once per year;*
 - iv. *Chair all meetings of the committee and circulate minutes to all representatives and the Minister; and*
 - v. *Oversee the annual review of the Googong Foreshores Interface Management Strategy as required by condition 6.*

Prior to referring Googong Township to the Department under the EPBC Act, GTPL (formerly Googong Development Corporation) undertook extensive consultations with key stakeholders which led to the establishment of the Googong Foreshores Township Interface Working Group (the "Working Group").

The Working Group is comprised of representatives of the Department, ACT Parks and Conservation, Icon Water, Queanbeyan-Palerang Regional Council, the Department of Finance, and GTPL.

On 30 November 2012 the Department advised that the Working Group may be considered to be the committee required by CoA 3.

Since approval of Googong Township, Working Group meetings (May-June and November-December each year, depending on working group member availability) have continued to monitor and advance the resolution of issues arising in the planning and development of Googong Township and its interface with the Googong Foreshores and Matters of National Environmental Significance. In particular, the early Working Group meetings and site tours focused on the preparation of the PTWL-P&MP and the GFIMS. More recent meetings (i.e. 2014-20) have focused on the implementation of the measures

committed to in these documents, together with attending to numerous other items that have arisen over time.

GTPL has called and chaired each meeting and distributed minutes to all invitees.

4. *To prevent impacts on the Hoary Sunray (Leucochrysum albicans var. tricolor) during construction, the person taking the action must fence and sign 'no go areas' of Hoary Sunray habitat in the vicinity of the Bulk Water Pumping Station and existing ACTEW Googong Water Treatment Plant.*

The Hoary Sunray populations identified in the EPBC Act referral of the Googong Township were protected from impacts during construction by the installation of appropriate fencing and 'no go area' signage.

Construction works for the Bulk Water Pumping Station and associated infrastructure were completed prior to the 2015 compliance report and the Hoary Sunray populations were not impacted.

5. *Within 30 days from the commencement of the action, the person taking the action must advise the department in writing of the actual day of commencement.*

On 26 June 2012, GTPL notified the Department of the commencement of the action. On 4 June 2012 GTPL provided possession of site of Stages 1 & 2 of Neighbourhood 1A to the civil contractor who commenced work shortly after that date.

6. *Within three months of every 12 month anniversary of the commencement of the action, the person taking the action must publish a report on their website addressing compliance with each of the conditions of this approval, including implementation of any management plans and strategies as specified in the conditions. Documentary evidence providing proof of the date of publication and non-compliance within any of the conditions of this approval must be provided to the department at the same time as the compliance report is published.*

This compliance report is the eighth compliance report required by CoA 6 (the first dated 10 September 2013, second dated 29 July 2014, third dated 19 August 2015, fourth dated 12 August 2016, fifth dated 23 August 2017, sixth dated 3 September 2018, seventh dated 26 September 2019). This report is being provided to the Department and will be published on <http://compliance.googong.net/epbc/>.

As described in this compliance report and outlined in the attached EPBC approval conditions compliance table, compliance with each CoA has been achieved to date. No non-compliance with the CoA has occurred.

7. *Upon the direction of the Minister, the person taking the action must ensure that an independent audit of compliance with the conditions of approval is conducted and a report submitted to the Minister. The independent auditor must be approved by the Minister prior to the commencement of the audit. Audit criteria must be agreed by the Minister and the audit report must address the criteria to the satisfaction of the Minister.*

The Minister has not requested an independent audit of compliance with the CoA.

8. *If the person taking the action wishes to carry out any activity otherwise than in accordance with the plan or strategy referred to in conditions 1 and 2, the person taking the action must submit for the Minister's written approval a revised version of any such plan or strategy, that plan or strategy must be implemented in place of the plan or strategy originally approved. Unless the Minister has approved the revised plan or strategy, then the person taking the action must continue to implement the plan or strategy originally approved, referred to in conditions 1 and 2.*

As detailed under the responses to CoA 1 and CoA 2, both the PTWL-P&MP and GFIMS have been revised in order to permit the action to occur in a manner which differs from that specified in the original/previously approved version/s of the relevant plan and strategy. Each revision was submitted to the Department for Ministerial approval. GTPL has ensured receipt of the corresponding approval prior to commencing any works other than those permitted by the original/previous approval.

9. *If the Minister believes that it is necessary or convenient for the better protection of listed threatened species and communities and Commonwealth land to do so, the Minister may request that the person taking the action make specified revisions to the plan or strategy approved pursuant to conditions 1 and 2 and submit the revised plan or strategy for the Minister's written approval. The person taking the action must comply with any such request. The revised approved plan or strategy must be implemented. Unless the Minister has approved the revised approved strategy, then the person taking the action must continue to implement the plan or strategy originally approved, referred to in conditions 1 and 2.*

The Minister has not requested any revisions to be made to the plan or strategy listed in CoA 1 and 2.

10. *If, at any time after five (5) years from the date of this approval, the person taking the action has not substantially commenced the action, then the person taking the action must not substantially commence the action without the written agreement of the Minister.*

The action commenced in June 2013.

11. *The person taking the action must maintain accurate records substantiating all activities associated with or relevant to the conditions of approval, including measures taken to implement the management plan or strategy required by the approval, and make them available upon request to the department. Such records may be subject to audit by the department or an independent auditor in accordance with section 458 of the Environmental Protection and Biodiversity Conservation Act 1999, or used to verify compliance with the conditions of approval. Summaries of audits will be posted on the department's website. The results of audits may also be publicised through the general media.*

Records of compliance with the CoA are being maintained by GTPL and are available for provision to the Minister on request.

12. *Unless otherwise agreed to in writing by the Minister, the person taking the action must publish all management plans or strategies (however described) referred to in these conditions of approval on their website. Each plan or strategy must be published within one (1) month of being approved.*

The currently approved plans and strategies and their corresponding website links are as follows.

1. Pink-tailed Worm-Lizard Protection and Management Plan (Version 6, dated 10 October 2019), prepared and approved in accordance with CoA1.

<http://compliance.googong.net/epbc/pink-tailed-worm-lizard-protection-and-management-plan.php.html>

2. Googong Foreshores Interface Management Strategy (Version 3, dated 7 July 2014), prepared and approved in accordance with CoA2.

<http://compliance.googong.net/epbc/foreshores-interface-management-strategy.php.html>

I am happy to discuss any questions you may have.

Yours sincerely,

Tim Corby
Development Manager

Condition Number/ reference E.g. '3(c)'	Condition Include the complete wording of the condition, or sub-condition that is being addressed.	Is the project compliant with this condition? Compliant/ Non-Compliant/ Not applicable	Evidence/Comments Evidence to support claims regarding compliance or non-compliance.
1	<p><i>The person taking the action must prepare and submit a Pink-tailed Worm-lizard Protection and Management Plan for the Minister's approval for the protection of Pink-tailed Worm-lizard (Aprasia parapulchella). The plan must include:</i></p> <ul style="list-style-type: none"> <i>i. Details of the establishment of the Pink-tailed Worm-lizard Conservation Area;</i> <i>ii. Management measures to mitigate construction impacts;</i> <i>iii. Measures for the management of the Pink-tailed Worm-lizard Conservation Area for before and after the conservation area's dedication to Queanbeyan City Council or other appropriate authority;</i> <i>iv. Maps showing fences and other infrastructure;</i> <i>v. Details of legal mechanisms to protect the conservation area in perpetuity; and</i> <i>vi. Provision for public comment on the draft plan.</i> <p><i>The plan must be submitted to the Minister for written approval within 6 months of the date of this approval.</i></p> <p><i>The person taking the action must not commence construction within 50m of Pink-tailed Worm-lizard habitat until the Minister has approved the plan.</i></p> <p><i>The approved Pink-tailed Worm-lizard Protection and Management Plan must be implemented.</i></p>	Compliant	<p>The Pink-tailed Worm-lizard Protection and Management Plan (PTWL-P&MP) (Version 2, dated 4 July 2012) was prepared by Biosis Pty Ltd on behalf of Googong Township Pty Ltd (GTPL) pursuant to CoA1, and was approved by the Minister's Delegate, Charmayne Murray, on 17 July 2012. As detailed in the PTWL-P&MP, the trigger for commencement of works to establish, protect and improve the PTWL habitat within the PTWL Conservation Area is the commencement of construction works within 50m of the identified Pink-tailed Worm-lizard habitat (referred to as the 'Year 0 Trigger Line').</p> <p>The PTWL-P&MP underwent four revisions subsequent to the initial approval, with Version 5, dated 6 July 2014, submitted to the Department of the Environment and Energy (the 'Department') on 16 July 2014 and approved by the Minister's Delegate, Shane Gaddes, on 2 September 2014.</p> <p>Section 3.3 of the PTWL-P&MP (Ongoing review of this PTWL – P&MP) states that –</p> <p><i>This PTWL-P&MP is subject to review at least every five (5) years. Reviews will be undertaken to provide for adaptive management and to ensure that the objectives of the PTWL Conservation Area are being suitably achieved. The review will be conducted by GTPL prior to handover to Council and by Council post handover. GTPL and Council may conduct the review in-house if suitable expertise is available or engage another suitably qualified specialist/organisation.</i></p> <p>In accordance with the above, GTPL, assisted by Capital Ecology, continue to review the PTWL-P&MP on a regular basis to guide establishment of the PTWL Conservation Area and its ongoing monitoring and management. In addition to this, in 2019 GTPL engaged Capital Ecology to review the PTWL-P&MP and its implementation. Based on this review, together with the findings of studies and observations from the last five years, it was determined that several elements of the actions/commitments of the PTWL-P&MP required minor modification to best achieve the objectives of the PTWL Conservation Area and accommodate engineering constraints identified during detailed design for the future Neighbourhood 5 which will adjoin the PTWL Conservation Area's southern boundary. Accordingly, Version 6 of the PTWL-P&MP was developed to reflect the necessary modifications and submitted to the Department on 10 October 2019. Version 6 was approved by the Minister's Delegate, Greg Manning, on 24 October 2019, and a copy was then uploaded to http://compliance.googong.net/epbc/.</p> <p>As detailed in Version 6 of the PTWL-P&MP, one of the key modifications is that GTPL decided to bring forward establishment of the Stage 2 boundary (i.e. Stage 2 fence construction, importation of habitat rock, and PTWL translocation) to the 2019-20 financial year, rather than wait for the Stage 2 trigger. Accordingly, establishment of the Stage 2 boundary was completed in July 2020, and this completes establishment of the PTWL Conservation Area. Bringing establishment of the Stage 2 boundary forward is a positive outcome for the conservation of the PTWL at Googong.</p>
2	<p><i>To prevent impacts on listed threatened species and ecological communities, and the environment on Commonwealth land, the person taking the action must prepare and submit a Googong Foreshores Interface Management Strategy for the Minister's approval. Stage 9 includes land comprising part of the GFIMS Area and designated MA4 – Managed Residential Area in the GFIMS. Approval of the DA was received in May 2020 and works commenced in August 2020.</p> <p>It is recognised that an earlier expected commencement for Stage 9 of NH1B was noted in the 2018 compliance report, however approval of the DA for Stage 9 was substantially delayed by the extended period of odour testing required for the adjacent Googong Water Recycling Plant. This delay pushed back the commencement for Stage 9 to August 2020 as noted above.</p> <p>The NH1B Stage 9 area of MA4 is additional to the portion of the GFIMS Area encompassed by the PTWL Conservation Area (i.e. MA1), and thus, to date this area has not been subject to specific monitoring. Commencement of development within Stage 9 will trigger the implementation of the GFIMS and the corresponding requirement set out in Section 6.2.1 of the GFIMS to undertake the first annual monitoring event during 2020-21. As prescribed in Section 6.2.2, the results of the monitoring event will be reported on in the GFIMS Implementation Report to be prepared following the monitoring event. The GFIMS Implementation Report will be reviewed by the GFTI Working Group and then published on http://compliance.googong.net/epbc/ and a copy will be provided to the Department.</p>
3	<p>Following approval of the Googong Foreshores Interface Management Strategy and prior to commencement of construction of neighbourhoods 1B or 5, the person taking the action must establish a committee that would oversee the implementation of the Googong Foreshores Interface Management Strategy and;</p> <p>i. Invite relevant stakeholders to sit on the committee, including representatives from relevant government agencies;</p>	Compliant	<p>Prior to referring Googong Township to the Department under the EPBC Act, GTPL (formerly Googong Development Corporation) undertook extensive consultations with key stakeholders which led to the establishment of the Googong Foreshores Township Interface Working Group (the 'Working Group').</p> <p>The Working Group is comprised of representatives of the Department, ACT Parks and Conservation, Icon Water, Queanbeyan-Palerang Regional Council, the Department of Finance, and GTPL.</p> <p>On 30 November 2012 the Department advised that the Working Group may be considered to be the committee required by CoA 3.</p>

	<p>ii. Call committee meetings in May and November of each year to consider and determine responses to issues associated with implementation of the Googong Foreshores Interface Management Strategy until all its obligations under the Googong Foreshores Interface Management Strategy have been met and land subdivision and water cycle project works have been completed;</p> <p>iii. Ensure the committee meets at least once per year;</p> <p>iv. Chair all meetings of the committee and circulate minutes to all representatives and the Minister; and</p> <p>v. Oversee the annual review of the Googong Foreshores Interface Management Strategy as required by condition 6.</p>		<p>Since approval of Googong Township, Working Group meetings (May-June and November-December each year, depending on working group member availability) have continued to monitor and advance the resolution of issues arising in the planning and development of Googong Township and its interface with the Googong Foreshores and Matters of National Environmental Significance. In particular, the early Working Group meetings and site tours focused on the preparation of the PTWL-P&MP and the GFIMS. More recent meetings (i.e. 2014-20) have focused on the implementation of the measures committed to in these documents, together with attending to numerous other items that have arisen over time.</p> <p>GTPL has called and chaired each meeting and distributed minutes to all invitees.</p>
4	<p>To prevent impacts on the Hoary Sunray (<i>Leucochrysum albicans</i> var. <i>tricolor</i>) during construction, the person taking the action must fence and sign 'no go areas' of Hoary Sunray habitat in the vicinity of the Bulk Water Pumping Station and existing ACTEW Googong Water Treatment Plant.</p>	Compliant	<p>The Hoary Sunray populations identified in the EPBC Act referral of the Googong Township were protected from impacts during construction by the installation of appropriate fencing and 'no go area' signage.</p> <p>Construction works for the Bulk Water Pumping Station and associated infrastructure were completed prior to the 2015 compliance report and the Hoary Sunray populations were not impacted.</p>
5	<p>Within 30 days from the commencement of the action, the person taking the action must advise the department in writing of the actual day of commencement.</p>	Compliant	<p>On 26 June 2012, GTPL notified the Department of the commencement of the action. On 4 June 2012 GTPL provided possession of site of Stages 1 & 2 of Neighbourhood 1A to the civil contractor who commenced work shortly after that date.</p>
6	<p>Within three months of every 12 month anniversary of the commencement of the action, the person taking the action must publish a report on their website addressing compliance with each of the conditions of this approval, including implementation of any management plans and strategies as specified in the conditions. Documentary evidence providing proof of the date of publication and non-compliance within any of the conditions of this approval must be provided to the department at the same time as the compliance report is published.</p>	Compliant	<p>This compliance report is the eighth compliance report required by CoA 6 (the first dated 10 September 2013, second dated 29 July 2014, third dated 19 August 2015, fourth dated 12 August 2016, fifth dated 23 August 2017, sixth dated 3 September 2018, seventh dated 26 September 2019). This report is being provided to the Department and will be published on http://compliance.googong.net/epbc/. No non-compliance with the CoA has occurred.</p>
7	<p>Upon the direction of the Minister, the person taking the action must ensure that an independent audit of compliance with the conditions of approval is conducted and a report submitted to the Minister. The independent auditor must be approved by the Minister prior to the commencement of the audit. Audit criteria must be agreed by the Minister and the audit report must address the criteria to the satisfaction of the Minister.</p>	Compliant	<p>The Minister has not requested an independent audit of compliance with the CoA.</p>
8	<p>If the person taking the action wishes to carry out any activity otherwise than in accordance with the plan or strategy referred to in conditions 1 and 2, the person taking the action must submit for the Minister's written approval a revised version of any such plan or strategy, that plan or strategy must be implemented in place of the plan or strategy originally approved. Unless the Minister has approved the revised plan or strategy, then the person taking the action must continue to implement the plan or strategy originally approved, referred to in conditions 1 and 2.</p>	Compliant	<p>As detailed under the responses to CoA 1 and CoA 2, both the PTWL-P&MP and GFIMS have been revised in order to permit the action to occur in a manner which differs from that specified in the original/previously approved version/s of the relevant plan and strategy. Each revision was submitted to the Department for Ministerial approval. GTPL has ensured receipt of the corresponding approval prior to commencing any works other than those permitted by the original/previous approval.</p>
9	<p>If the Minister believes that it is necessary or convenient for the better protection of listed threatened species and communities and Commonwealth land to do so, the Minister may request that the person taking the action make specified revisions to the plan or strategy approved pursuant to conditions 1 and 2 and submit the revised plan or strategy for the Minister's written approval. The person taking the action must comply with any such request. The</p>	Compliant	<p>The Minister has not requested any revisions to be made to the plan or strategy listed in CoA 1 and 2.</p>

	<i>revised approved plan or strategy must be implemented. Unless the Minister has approved the revised approved strategy, then the person taking the action must continue to implement the plan or strategy originally approved, referred to in conditions 1 and 2.</i>		
10	<i>If, at any time after five (5) years from the date of this approval, the person taking the action has not substantially commenced the action, then the person taking the action must not substantially commence the action without the written agreement of the Minister.</i>	Compliant	The action commenced in June 2013.
11	<i>The person taking the action must maintain accurate records substantiating all activities associated with or relevant to the conditions of approval, including measures taken to implement the management plan or strategy required by the approval, and make them available upon request to the department. Such records may be subject to audit by the department or an independent auditor in accordance with section 458 of the Environmental Protection and Biodiversity Conservation Act 1999, or used to verify compliance with the conditions of approval. Summaries of audits will be posted on the department's website. The results of audits may also be publicised through the general media.</i>	Compliant	Records of compliance with the CoA are being maintained by GTPL and are available for provision to the Minister on request.
12	<i>Unless otherwise agreed to in writing by the Minister, the person taking the action must publish all management plans or strategies (however described) referred to in these conditions of approval on their website. Each plan or strategy must be published within one (1) month of being approved.</i>	Compliant	The currently approved plans and strategies and their corresponding website links are as follows. <ol style="list-style-type: none"> 1. Pink-tailed Worm-Lizard Protection and Management Plan (Version 6, dated 10 October 2019), prepared and approved in accordance with CoA1. http://compliance.googong.net/epbc/pink-tailed-worm-lizard-protection-and-management-plan.php.html 2. Googong Foreshores Interface Management Strategy (Version 3, dated 7 July 2014), prepared and approved in accordance with CoA2. http://compliance.googong.net/epbc/foreshores-interface-management-strategy.php.html
