

Googong Water Recycling Plant

Notification to Residents: Out of Hours Work (OOHW)

29 August 2015 | OOHW Notification

September 2015 - Weekend Works at Googong WRP

Dear Resident,

The following inaudible OOHW is planned for the period of September 2015:

- Saturday 5, 12, 19 and 26 from 07:00 - 08:00 and 13:00 – 18:00. Inaudible equipment and electrical fit-out and testing. (No jack hammering, saw cutting concrete works or deliveries)
- Sunday 6, 13, 20 and 27 from 07:00 - 18:00. Inaudible equipment and electrical fit-out and testing (No use of heavy plant and equipment is anticipated. Mainly hand tools)

Reason for out of hours work

Normal construction hours are Monday to Friday from 7am to 6pm, and Saturdays from 8am to 1pm. Currently multiple trades are working in the same area and congestion in the current peak, will lead to unsafe working environment. Extending work hours will enable separation of trades during these periods and greatly reduce the safety issue.

Location of Works

OOHW activities will only take place within the confines of the WRP site with vehicles parking in the existing car park.

Expected Noise Impacts

Noise monitoring of similar construction activities has already been conducted during the week days. Noise generated by the weekend activities is predicted to be no more than the noise from weekday activities and it is expected to be less due to the reduced workforce.
